

The Transport Project is the North American organization dedicated to the ongoing development of a growing, profitable, and sustainable marketplace for gaseous fuels and fleets.

MEMBERS

The 200+ Transport Project member family

Member companies represent the entire value chain of the gaseous fuel transportation industry:

- > Fleets
- > Original equipment manufacturers (OEMs)
- > Engine, powertrain, and fuel system manufacturers
- > Equipment and service suppliers
- > Vehicle dealers, upfitters and modifiers
- > Geologic and renewable natural gas (RNG) producers and operators
- > Hydrogen fuel producers, distributors, and operators
- > Station operators and developers; fuel marketers and providers
- > High horsepower application users, including rail, marine, construction, and agriculture
- > Industry trade association partners and Clean Cities and Communities coalitions

ADVOCACY

Putting more gaseous-fueled vehicles on the road by:

- > Leading public policy and regulatory initiatives at the state, regional, and federal levels
- > Communicating the value of gaseous fuels to policymakers, media, and consumers through fact-based discussions
- > Developing common industry standards and best practices for the safe, efficient, and reliable operation of gaseous-fueled vehicles
- > Convening industry leaders to develop strategies that encourage a strong and growing marketplace and build business-to-business relationships

MEMBER VALUE

Benefits of membership include:

- > **Seat at the Table**
Have your views heard as the industry navigates a challenging public policy and regulatory environment
- > **One-on-One Support**
Experienced staff works directly with members to assist on issues that support your business operations
- > **Industry Committees**
Participation in committee efforts to tackle key initiatives – State and Federal Advocacy, Technology and Sustainability, Communications and Marketing, Virtual Pipelining
- > **Policy Portal**
Access to members-only comprehensive state-by-state data covering vehicles, fueling stations, taxes, incentives, grant opportunities, and legislation
- > **Market Trends & Industry Collaterals**
Access to industry information and promotional reports that assist in sales, business development, and safety practices
- > **Fueling Infrastructure Report**
Quarterly report on fueling infrastructure in the U.S. that includes up-to-date lists of stations, contact information, and accessibility
- > **Business Directory**
Directory of TTP members dedicated to providing the highest quality products and services
- > **Newsletter & President's Report**
Aggregate of top gaseous fuel-related news items delivered weekly by email; bimonthly report by TTP chief executive highlighting organization activities and key industry developments and headlines
- > **Annual NGV Industry Summit & Networking Forums**
The Transport Project is the convening voice of the gaseous fuel industry, and members take part in special events that bring industry leaders together several times a year

The Transport Project: Who We Are

The Transport Project is a national coalition of roughly 200 fleets, vehicle and engine manufacturers, servicers and suppliers, and fuel producers and providers dedicated to the decarbonization of North America's transportation sector.

Through the increased use of gaseous motor fuels including renewable natural gas and hydrogen, the United States and Canada can achieve ambitious climate goals and greatly improve air quality safely, reliably, and effectively without delay and without compromising existing commercial business operations.

> Our Vision

North America's fleets run safely, reliably, and effectively on clean, renewable fuels.

> Our Purpose

To serve as the national voice advancing the growth and deployment of practical, clean, gaseous fuels for transportation.

> Our Mission

We advance our industry and serve our members by:

- Advocating for fair and effective legislation and regulations
- Informing and educating about the availability, use and benefits of clean gaseous fuels and vehicles
- Continually improving safety through sensible codes, standards, and practices
- Collaborating and convening across the transportation industry
